PROGRAMMING LANGUAGES	JavaScript, Java, Python, C
LIBRARIES/FRAMEWORKS	React, Node
TOOLS / PLATFORMS	GIT, Windows
DATABASES	MongoDB

PROJECTS / OPEN-SOURCE

SIMPLE PORTFOLIO

Developed a responsive personal portfolio website to showcase my skills, projects, and experiences.

FULL-STACK REAL-TIME CHAT APPLICATION | LINK React, Node.js, Express, Socket.IO, WebSockets, User Authentication, Responsive UI

Developed a feature-rich chat application enabling real-time communication using WebSockets. Built with React (frontend), Node.js & Express (backend), and Socket.IO for seamless live messaging. Implemented user authentication, active user status, and responsive UI. Designed with scalability and performance in mind, making it suitable for both personal and collaborative group communication.

WEATHER FORECAST -WEBSITE | LINK React, Vite, JavaScript, WeatherAPI, CSS, Font Awesome

A responsive multi-page React application that displays real-time weather data using the WeatherAPI. Features include dark mode, weekly forecast, temperature unit toggle (C/F), and a personalized footer with social media integration using Font Awesome icons. Styled with plain CSS for a clean user experience.
